

Hsa-miR-326 targets *CCND1* and inhibits non-small cell lung cancer development

Supplementary Materials

Supplementary Figure S1: Ectopic expression of miR-326 doesn't vary the mRNA levels of cyclin D1 in A549 and SPC-A-1 cells. (A) miR-326 mimic treatment increases the expression of miR-326, while miR-326 inhibitor treatment decreases it. (B) Ectopic expression of miR-326 doesn't vary the mRNA levels of cyclin D1 in A549 and SPC-A-1 cells. Assays were performed in triplicate Means \pm SEM was shown. Statistical analysis was conducted using student *t*-test.
