

**Mir-342-3p, miR-193b, miR-99b, miR-125a-5p and EVL expression in human donors-derived monocytes and macrophages.** (A) MiR-342-3p, miR-193b, miR-99b and miR-125a-5p expression in four (D1-D4) independent human donor-derived monocytes, 72 hours nontreated and IL-4 stimulated macrophages. Error bars indicate the standard deviation (SD) of the three technical replicates. (B) EVL expression in two other (D2, D3) human donor-derived differentiating macrophages in the absence or presence of IL-4. Error bars indicate the standard deviation (SD) of the three technical replicates. (C) MiR-342-3p in two other (D2, D3) human donor-derived differentiating macrophages in the absence or presence of IL-4. Error bars indicate the standard deviation (SD) of the three technical replicates.
