

Table e-1. EEG reports were available for 22 of the 87 children with perinatal arterial ischemic stroke.

Age of the patient (in days of life) at the time of the initial and follow-up EEG (when available) and

EEG results are provided.

Age (days)	Initial EEG Results	Age (days)	Follow-up EEG Results
0	Electrographic seizures, abnormal background, focal slowing, epileptiform discharges	1	Abnormal background, focal slowing, epileptiform discharges
1	Abnormal background, focal slowing, epileptiform discharges	none	
1	Electrographic seizures, epileptiform discharges	none	
1	Electrographic seizures, abnormal background, focal slowing, epileptiform discharges	none	
1	Electrographic seizures, abnormal background, epileptiform discharges	4	Electrographic seizures, abnormal background, focal slowing, epileptiform discharges
1	Abnormal background, epileptiform discharges	9	Epileptiform discharges
2	Abnormal background, focal slowing, epileptiform discharges	none	
2	Electrographic seizures, abnormal background, epileptiform discharges	none	
2	Electrographic seizures, abnormal background, epileptiform discharges	none	
2	Normal	41	Abnormal background
3	Abnormal background	none	

3	Abnormal background, focal slowing, epileptiform discharges	none	
3	Abnormal background, focal slowing	9	Abnormal background
4	Normal	none	
4	Electrographic seizures, abnormal background, epileptiform discharges	none	
5	Normal	none	
6	Normal	none	
14	Electrographic seizures, abnormal background, epileptiform discharges		
188	Epileptiform discharges	none	Electrographic seizures, epileptiform discharges
213	Normal	515	Abnormal background, epileptiform discharges
293	Abnormal background, focal slowing	none	
1550	Electrographic seizures, abnormal background, focal slowing, epileptiform discharges	none
