

**Supplemental
Figure 3**

Supplemental Figure S3. Early growth phenotypes in *Arabidopsis* with altered *CGR2* and *CGR3* expression. (A) Height of hypocotyls in 8-day old seedlings, and (B) surface area of the cotyledons in 6-day old seedlings is presented for Col-0, cgr2com, CGR2OX, and cgr2/3. Values represent the mean \pm SE. For (A), n = 20 plants per line. For (B), n = 10 plants per line. Statistical differences at $\alpha = 0.05$ are marked with lower case letters.
