

SUPPLEMENTARY FIGURE AND TABLE

Supplementary Figure S1: Binding of Polymerase II (Pol II) at the mouse *YAP* (*mYAP*) and mouse *MKK3* (*mMKK3*) promoters. The bindings of Pol II at the +1 regions of *mYAP* **A.** and *mMKK3* promoters **B.** were measured by ChIP experiments. A 2k region upstream (-2k) of the transcription start site (TSS) or a 2k region downstream (+2k) of *mYAP* or *mMKK3* genes were also parallel analyzed as the negative controls. ChIP experiments using a non-specific IgG control were also performed to support the specific bindings of Pol II. The data are shown as the means + SD from three independent experiments. **, $p < 0.01$ using the Student's t test.
