SUPPLEMENTARY DATA

**Supplementary Table A.** Estimated glomerular filtration rate (eGFR) based on the MDRD equation using serum creatinine of 1.5 mg/dL for men and 1.4 mg/dL for women in African Americans (AA) and other races (non-AA)

Age (years)	AA	non-AA	AA	non-AA
	Male	Male	Female	Female
20	69	60	58	48
30	64	55	54	44
40	60	52	50	42
50	57	50	48	40
60	55	48	46	38
70	54	46	45	37
80	52	45	44	36

Footnote: The MDRD equation used in this table is the following:

$$\text{GFR (mL/min/1.73 m}^2\text{)} = 175 \times (S_{\text{cr}})^{-1.154} \times (\text{Age})^{-0.203} \times (0.742 \text{ if female}) \times (1.212 \text{ if African American})$$
