

Table S3. No significant difference (p-value 0.65) when comparing the mutation frequency in experiments with and without SYBR green

	Mutation frequency	95% confidence interval
Without SYBR green	2.2×10^{-6}	$1.2-3.5 \times 10^{-6}$
With SYBR green	2.6×10^{-6}	$1.2-4.4 \times 10^{-6}$

Data from *MECP2* experiments
