

**Supplementary Fig. 1. The duration of the anti-allodynic effect of EA at GV3 and ST36.** Assessment of anti-allodynic effect of EA were performed 20 min, 1, and 2 hours after EA treatment in two groups: (a) GV3 (n=6), (b) ST36 (n=5). The effect of EA at GV3, ST36 lasted until one hour after EA stimulation. Data are presented as mean±S.E.M.; \*\*\*p<0.001, \*\*p<0.01, \*p<0.05; by paired t-test.
