

Supplemental Figure S6. Analysis of snRNA levels in transgenic rescue lines. (A) Northern blot of snRNA in the *Phax* mutant and *Phax* rescue line (*Arm>Phax*) relative to WT 60h larvae; quantified in panel (B). (C) Northern blot of snRNA levels in the *Smn* mutant and *Smn* rescue line (*Tg:Smn*^{WT}) relative to WT 60h; quantified in panel (D). U6-normalized snRNA levels of WT were set at 100.
