

Appendix 6 (as supplied by the authors): Proportion of adults (secondary analysis) receiving rehabilitation by mechanism of injury in the Terres-Cries-de-la-Baie-James.

Adult patients that were involved in motor vehicle collisions were more likely to receive rehabilitation than all other mechanisms of injury. ATV = all-terrain vehicle collision, HR 18 = Terres-Cries-de-la-Baie-James health region, MVC = motor vehicle collision.
