

FIG S2 Fc function is not required for MEDI4893* protection in lethal bacteremia. Balb/c mice (n=10) were passively immunized IP with MEDI4893* (■), MEDI4893*_{N297Q} (▲) or c-IgG (○) at 15mpk, and infected 24h later with SF8300 (5e7 CFU). Survival was monitored for 14 days. Statistical difference for survival between MEDI4893*, and MEDI4893*_{N297Q} versus c-IgG was analyzed with a Log Rank (Mantel Cox) test. Values were considered statistically different if p<0.05. Data are representative of two independent experiments.
