

Certified reference materials for testing of the presence/absence of *Staphylococcus aureus* enterotoxin A (SEA) in cheese

R. Zeleny, Y. Nia, H. Schimmel, I. Mutel, J.-A. Hennekinne, H. Emteborg, J. Charoud-Got, F. Auvray

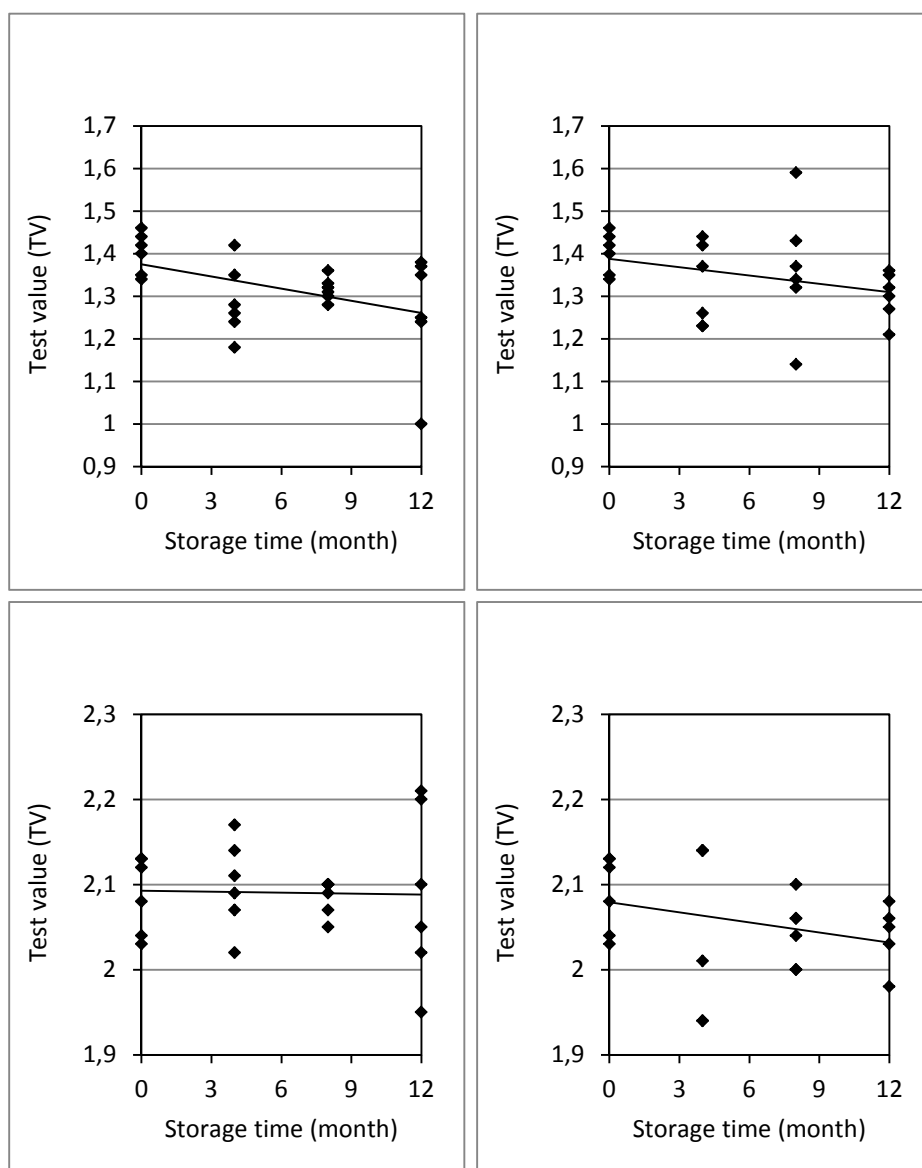

Fig. S1. Results of the one-year stability study of IRMM-359b and IRMM-359c using the ESM/VIDAS for analysis. The obtained results per individual time point and the respective regression lines are shown. Upper part: IRMM-359b, storage temperature 4°C (left) and -20 °C (right). Lower part: IRMM-359c, storage temperature 4°C (left) and -20 °C (right)

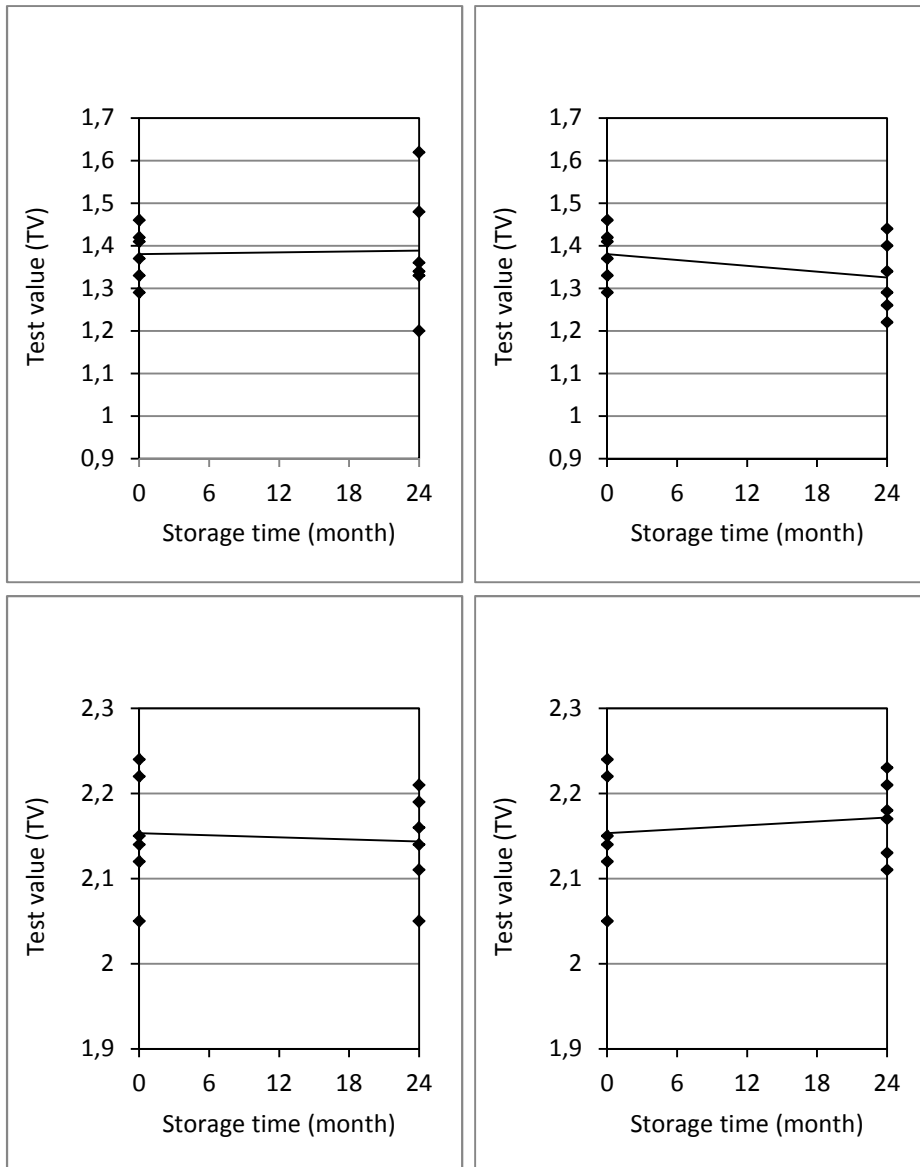

Fig. S2. Results of the 2-year stability study of IRMM-359b and IRMM-359c using the ESM/VIDAS for analysis. The obtained results per individual time point and the respective regression line are shown. Upper part: IRMM-359b, storage temperature 4⁰C (left) and -20⁰C (right). Lower part: IRMM-359c, storage temperature 4⁰C (left) and -20⁰C (right)
