

## Supplementary Data

**SUPPLEMENTARY FIG. S1.** E-cadherin as well as  $\beta$ -catenin expression is not changed in Caco2 cells under 3D culture conditions. E-cadherin (*green*) and  $\beta$ -catenin (*red*) are colocalized (*yellow*) in Caco2 cells cultured on the SISmuc in monoculture (**A**) and in coculture with fibroblasts (*arrows*) (**B**). Scale bar in **B**: 75  $\mu$ m for (**A**, **B**).
