

SUPPLEMENTAL MATERIAL

Immune-mediated Reactions to Vancomycin: A Systematic Case Review

Supplementary eTable 1:

Table 1. Summary of identified immune-mediated HSRs reported from vancomycin

	Total cases included	Source
Linear IgA bullous dermatosis	34	[1-26]
DRESS	16	[17-36]
IgE-mediated	7	[37-43]
Acute interstitial nephritis	8	[44-51]
Stevens-Johnson syndrome/toxic epidermal necrolysis	6	[52-57]

Abbreviations: HSR, hypersensitivity reaction
