

## Group 2: CTns / Lenke 4CN

F/18, UIV=T3 with right shoulder higher but choose T3 due to the kyphosis at T4-5. T/L AVT=1.7, T/L AVR=2, T/L Cobb=1.2 but choose nonselective fusion because she does not want potential truncal shift

Case 3. 18 year-old-girl with Group 2NS.
