

Figure S1. Assessment of publication bias using funnel plot. The lack of asymmetry in the funnel plot suggests no evidence of publication bias.

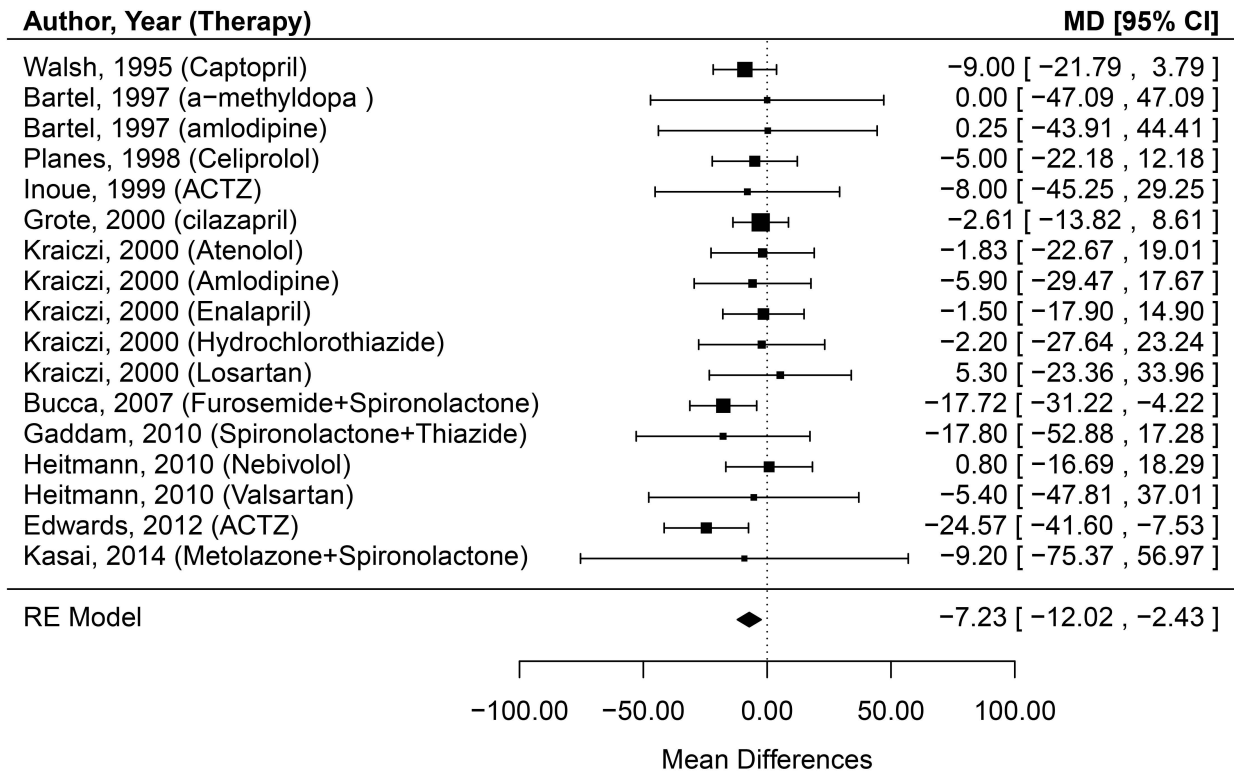

Figure S2. Effect of antihypertensive treatment (including acetazolamide) on change in severity of obstructive sleep apnea (mean change in apnea-hypopnea index). The effect size estimate is given for each study expressed in terms of mean differences (MD), with the corresponding 95% confidence interval (CI) indicated by the error bars. The pooled estimate is shown according to random effects (RE) model.
