

## Supplementary Data

**SUPPLEMENTARY FIG. S1.** Fraction of cis- and trans-eQTL associations in each dataset. The number at the end of each *row* is the total number of eQTL associations. The fraction of associations classified as trans-eQTL in the HA2 study is much higher than others as a result of that study considering all associations out to 4 Mb, as opposed to the more usual 1 Mb. eQTL, expression quantitative trait locus.
