

Figure S1a. Relation between age at time of death and *MAPT* expression stratified by H1/H2 haplotype (p<0.001 age, sex, study and H2 only; p<0.0001 adjusting for age, sex, study, H2 + path).

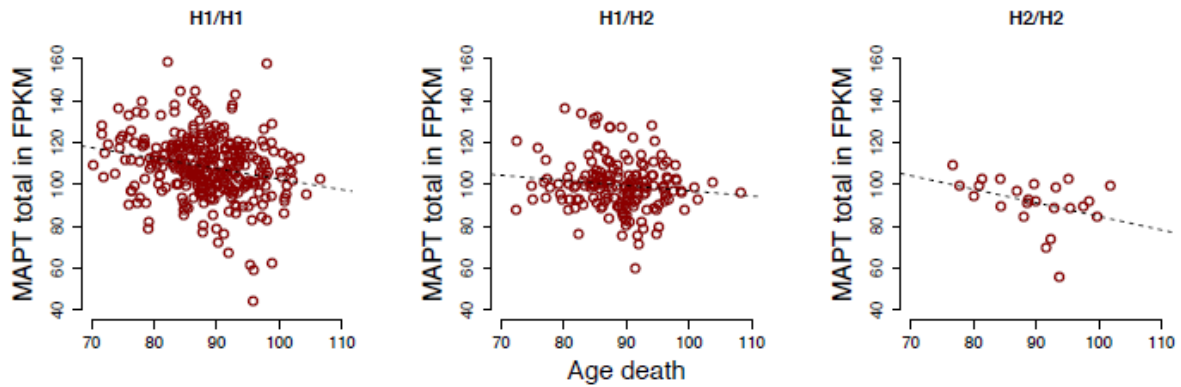

Figure S1b. Relation between age at time of death and *MAPT* 1N4R expression stratified by H1/H2 (p=0.58 adjusting for pathologies).
