All continuous variables reported as median (interquartile range) or n (%). COPD indicates chronic obstructive pulmonary disease; PTCA, percutaneous transluminal coronary angioplasty; CABG, coronary artery bypass graft; CPB, cardiopulmonary bypass; MVR, mitral valve replacement; MAP, mean arterial pressure.

All patient clinical history was defined by patient report or prior chart documentation

\*Doppler ultrasound

†Intraoperative epiaortic ultrasound (moderate atherosclerosis = 3-5mm calcification, and severe atherosclerosis = >5mm calcification)
