Supplementary Figure 1 Forest plots of genetic variants in GDM with all included studies. (A) IGF2BP2 rs4402960, (B) MTNR1B rs10830963, (C) TCF7L2 rs7903146, (D) IRS1 rs1801278, (E) PPARG rs1801282, (F) TNF- α rs1800629. The shadowed squares and their lateral tips indicate the ORs and the corresponding 95% CIs in individual studies, The central lines and lateral tips of the diamonds indicate the pooled ORs and the corresponding 95% CIs. The solid vertical lines indicate no effect.

C

Supplementary figure 4 Forest plots of genetic variants in GDM with studies after removing articles deviated from both Hardy-Weinberg equilibrium in control ($P < 0.05$) and publication bias (funnel plot outliers) together or only publication bias (funnel plot outliers) alone. (A) IGF2BP2 rs4402960, (B) TCF7L2 rs7903146, (C) PPARG rs1801282. The shadowed squares and their lateral tips indicate the ORs and the corresponding 95% CIs in individual studies, the central lines and lateral tips of the diamonds indicate the pooled ORs and the corresponding 95% CIs. The solid vertical lines indicate no effect.

Supplementary Figure 5: Chromosome locations of genes and SNPs

Supplementary Table 1: Sample sizes estimate (OSSE) of the genetic variants on GDM

Gene and SNP	80% CI	90% CI	95% CI
MTNR1B rs10830963	336	449	556
TCF7L2 rs7903146	20,278	27,151	33,580
IRS1 rs10830963	777	1,040	12,86
PPARG rs1801282	2,071	2,772	3,428

Genetic variants associated with gestational diabetes mellitus: a meta-analysis and subgroup analysis

Ling Wu, Long Cui, Wing Hung Tam, Ronald C.W. Ma & Chi Chiu Wang

Supplementary Table 2: Details of genes and genetic variants in GDM

Gene name	Symbol	Chromosome location	Variants	Gene function
Insulin-like growth factor 2 mRNA-binding protein 2	IGF2BP2	3q27.2	rs4402960	Insulin secretion
Melatonin receptor 1B	MTNR1B	11q21-q22	rs10830963	Insulin secretion
Transcription factor 7-like 2	TCF7L2	10q25.3	rs7903146	Insulin secretion
Insulin receptor substrate 1	IRS1	2q36	rs1801278(Gly972Arg)	Insulin resistance
Peroxisome proliferator-activated receptor gamma	PPARG	3p25	rs1801282(Pro12Ala)	Insulin resistance
Tumor necrosis factor alpha	TNF- α	6p21.3	rs1800629(-308G/A)	Inflammation
