

## Zhao\_Supplemental Figure S11

Supplemental Figure S11. *CBF* genes are not required for drought tolerance in *Arabidopsis*. (A) Water loss of 4-week-old Col-0, *cbf123-1*, and *cbf123-2* plants. Whole plants were removed from soil and weighed at indicated times (n=3). Error bars indicate the standard deviation of three biological replicates. (B) Drought tolerance of Col-0, *cbf123-1*, and *cbf123-2* plants. Plants were grown under standard condition for 3 weeks, and then drought tolerance assay was conducted by withholding water for 2 weeks, after which plants were photographed.
