

**Supplemental Figure 1:** Promoter activity of Arabidopsis *PIN1pro:GUS-GFP* and *PIN7pro:GUS-GFP* in uninfected roots and in *Meloidogyne incognita*-induced galls at 7 to 14 days after infection (DAI). (A) *PIN1pro:GUS-GFP* in an uninfected root, and in galls at 7, 9 and 14 DAI. (B) *PIN7pro:GUS-GFP* in an uninfected root, and in galls at 7, 9 and 14 DAI. UR, uninfected root; G, gall, n, nematode. Bars = 25 $\mu$ m.
