3 **Supplementary Figure 1.** Classification performance on stimulus or response
 4 patterns in young adults. Blue bars show classification performance on stimulus or
 5 response patterns using all the correct trials; red bars show classification performance
 6 on stimulus patterns using all the incorrect trials; green bars show classification
 7 performance on response patterns using all the incorrect trials. Note that the
 8 classifications based on stimuli or responses were the same for correct trials. ** $p <$
 9 0.01 by one-sample t tests. HG, Heschl's gyrus; POp, pars opercularis; postCG,
 10 postcentral gyrus; preCG, precentral gyrus; PT, planum temporale; STG, superior
 11 temporal gyrus.
