Age= Group 1 female is 21-45 years and male is 21-59 years. Group 2 female is 46-79 and male is 60-79.

Coefficients are expressed as change in ln (FeNO) per 1 unit change in the independent variable. BMI = body mass index; FeNO= fractional excretion nitric oxide; Blood eosinophils expressed as cells/mm<sup>3</sup>. CRP = C-reactive protein in ng/mL. \*Data available from 2007-2010.
