Additional File 1. SPIRIT Checklist.

Section/item	Item	Description	Addressed on		
	No		page number		
Administrative info	Administrative information				
Title	1	Descriptive title identifying the study design, population, interventions, and, if applicable, trial acronym	1,2		
Trial registration	2a	Trial identifier and registry name. If not yet registered, name of intended registry	3		
	2b	All items from the World Health Organization Trial Registration Data Set			
Protocol version	3	Date and version identifier	14		
Funding	4	Sources and types of financial, material, and other support	15		
Roles and	5a	Names, affiliations, and roles of protocol contributors	1, 15		
responsibilities	5b	Name and contact information for the trial sponsor	15		

	5c	Role of study sponsor and funders, if any, in study design; collection, management, analysis, and	
		interpretation of data; writing of the report; and the decision to submit the report for	15
		publication, including whether they will have ultimate authority over any of these activities	
	5d	Composition, roles, and responsibilities of the coordinating centre, steering committee, endpoint	16
		adjudication committee, data management team, and other individuals or groups overseeing the	
		trial, if applicable (see Item 21a for data monitoring committee)	
Introduction			
Background and	6a	Description of research question and justification for undertaking the trial, including summary of	3
rationale		relevant studies (published and unpublished) examining benefits and harms for each intervention	
	6b	Explanation for choice of comparators	3,4,5
Objectives	7	Specific objectives or hypotheses	5,6

Trial design	8	Description of trial design including type of trial (eg, parallel group, crossover, factorial, single group), allocation ratio, and framework (eg, superiority, equivalence, noninferiority, exploratory)	5	
Methods: Participants, interventions, and outcomes				
Study setting	9	Description of study settings (eg, community clinic, academic hospital) and list of countries where data will be collected. Reference to where list of study sites can be obtained	5,7	
Eligibility criteria	10	Inclusion and exclusion criteria for participants. If applicable, eligibility criteria for study centres and individuals who will perform the interventions (eg, surgeons, psychotherapists)	7	
Interventions	11a	Interventions for each group with sufficient detail to allow replication, including how and when they will be administered	8	
	11b	Criteria for discontinuing or modifying allocated interventions for a given trial participant (eg, drug dose change in response to harms, participant request, or improving/worsening disease)	8	
	11c	Strategies to improve adherence to intervention protocols, and any procedures for monitoring adherence (eg, drug tablet return, laboratory tests)	8	

	11d	Relevant concomitant care and interventions that are permitted or prohibited during the trial	8
Outcomes	12	Primary, secondary, and other outcomes, including the specific measurement variable (eg,	
		systolic blood pressure), analysis metric (eg, change from baseline, final value, time to event),	99
		method of aggregation (eg, median, proportion), and time point for each outcome. Explanation	
		of the clinical relevance of chosen efficacy and harm outcomes is strongly recommended	
Participant	13	Time schedule of enrolment, interventions (including any run-ins and washouts), assessments,	10
timeline		and visits for participants. A schematic diagram is highly recommended (see Figure)	
Sample size	14	Estimated number of participants needed to achieve study objectives and how it was	6
		determined, including clinical and statistical assumptions supporting any sample size calculations	
Recruitment	15	Strategies for achieving adequate participant enrolment to reach target sample size	77
Methods: Assignment of interventions (for controlled trials)			
Allocation:			

Sequence	16a	Method of generating the allocation sequence (eg, computer-generated random numbers), and	7
generation		list of any factors for stratification. To reduce predictability of a random sequence, details of any	
		planned restriction (eg, blocking) should be provided in a separate document that is unavailable	
		to those who enrol participants or assign interventions	
Allocation	16b	Mechanism of implementing the allocation sequence (eg, central telephone; sequentially	
concealment		numbered, opaque, sealed envelopes), describing any steps to conceal the sequence until	
mechanism		interventions are assigned	
Implementation	16c	Who will generate the allocation sequence, who will enrol participants, and who will assign	7
		participants to interventions	
Blinding (masking)	17a	Who will be blinded after assignment to interventions (eg, trial participants, care providers,	7
		outcome assessors, data analysts), and how	
	17b	If blinded, circumstances under which unblinding is permissible, and procedure for revealing a	8
		participant's allocated intervention during the trial	
Methods: Data coll	ection	, management, and analysis	

Data collection	18a	Plans for assessment and collection of outcome, baseline, and other trial data, including any	8, 10-12
methods		related processes to promote data quality (eg, duplicate measurements, training of assessors)	
		and a description of study instruments (eg, questionnaires, laboratory tests) along with their	
		reliability and validity, if known. Reference to where data collection forms can be found, if not in	
		the protocol	
	18b	Plans to promote participant retention and complete follow-up, including list of any outcome	
		data to be collected for participants who discontinue or deviate from intervention protocols	
Data management	19	Plans for data entry, coding, security, and storage, including any related processes to promote	12,13
		data quality (eg, double data entry; range checks for data values). Reference to where details of	
		data management procedures can be found, if not in the protocol	
Statistical	20a	Statistical methods for analysing primary and secondary outcomes. Reference to where other	12
methods		details of the statistical analysis plan can be found, if not in the protocol	
	20b	Methods for any additional analyses (eg, subgroup and adjusted analyses)	
		1	

	20c	Definition of analysis population relating to protocol non-adherence (eg, as randomised analysis), and any statistical methods to handle missing data (eg, multiple imputation)	12
Methods: Monito	ring		
Data monitoring	21a	Composition of data monitoring committee (DMC); summary of its role and reporting structure; statement of whether it is independent from the sponsor and competing interests; and reference to where further details about its charter can be found, if not in the protocol. Alternatively, an explanation of why a DMC is not needed	13
	21b	Description of any interim analyses and stopping guidelines, including who will have access to these interim results and make the final decision to terminate the trial	
Harms	22	Plans for collecting, assessing, reporting, and managing solicited and spontaneously reported adverse events and other unintended effects of trial interventions or trial conduct	8,9
Auditing	23	Frequency and procedures for auditing trial conduct, if any, and whether the process will be independent from investigators and the sponsor	

Ethics and dissemi	nation		
Research ethics	24	Plans for seeking research ethics committee/institutional review board (REC/IRB) approval	5
approval			
Protocol	25	Plans for communicating important protocol modifications (eg, changes to eligibility criteria,	
amendments		outcomes, analyses) to relevant parties (eg, investigators, REC/IRBs, trial participants, trial	
		registries, journals, regulators)	
Consent or assent	26a	Who will obtain informed consent or assent from potential trial participants or authorised	7
		surrogates, and how (see Item 32)	
	26b	Additional consent provisions for collection and use of participant data and biological specimens	
		in ancillary studies, if applicable	
Confidentiality	27	How personal information about potential and enrolled participants will be collected, shared,	13
		and maintained in order to protect confidentiality before, during, and after the trial	

			1
Declaration of	28	Financial and other competing interests for principal investigators for the overall trial and each	15
interests		study site	
Access to data	29	Statement of who will have access to the final trial dataset, and disclosure of contractual	
		agreements that limit such access for investigators	
Ancillary and post-	30	Provisions, if any, for ancillary and post-trial care, and for compensation to those who suffer	
trial care		harm from trial participation	
Dissemination	31a	Plans for investigators and sponsor to communicate trial results to participants, healthcare	
policy		professionals, the public, and other relevant groups (eg, via publication, reporting in results	
		databases, or other data sharing arrangements), including any publication restrictions	
	31b	Authorship eligibility guidelines and any intended use of professional writers	
	31c	Plans, if any, for granting public access to the full protocol, participant-level dataset, and	
		statistical code	
Appendices
