

Supplementary figure 1. OT-II mice expressed transgenic α -, and β - chain. Genotyping was performed with polymer chain reaction using genomic DNA isolated from cut tail tissues and primer for mouse OT-II TCR α -chain: forward: 5'-AAAGGGAGAAAAGCTCTCC-3', reverse: 5'-ACACAGCAGGTTCTGGGTTC-3'; mouse OT-II TCR β -chain: forward: 5'-GCTGCTGCACAGACCTACT-3', reverse: 5'-CAGCTCACCTAACACGAGGA-3'
