

	Returned data (N families)	% parents A- levels or higher	% Mother employed	% Father employed	% Female
UK census ^a	--	32%	49%	89%	50%
TEDS 1 st contact genotyped subsample	3,152	29%	47%	89%	54%
TEDS age 16 genotyped subsample	2,886	31%	47%	89%	55%

^a The UK 2001 census data (ONS, 2001) for families with children were used because they represent more appropriate comparisons than UK 2011 census data for TEDS twins who were born 1994 -1996.
