

Supplementary figure 1: Intrasubject distribution of original data for seven experimental sessions (■: Session 1; ●: Session 2; ▲: Session 3; ▼: Session 4; ◆: Session 5; ◀: Session 6; ◀: Session 7) in the right, non-dominant hemisphere of three subjects for RMT (a), medial-lateral CoG (b), anterior-posterior CoG (c), mean map MEP amplitude (d), map area (e) and map volume (f). This figure shows the findings for the subjects 3, 9 and 12 of Figure 1 including the data of the seventh measurement (acquired ~1.5 years after session 6).

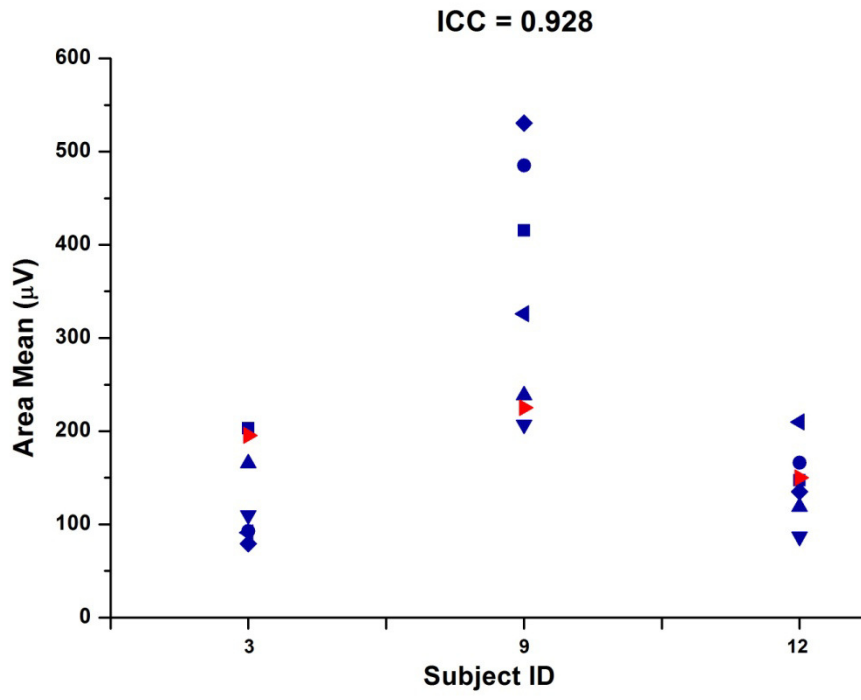

b)

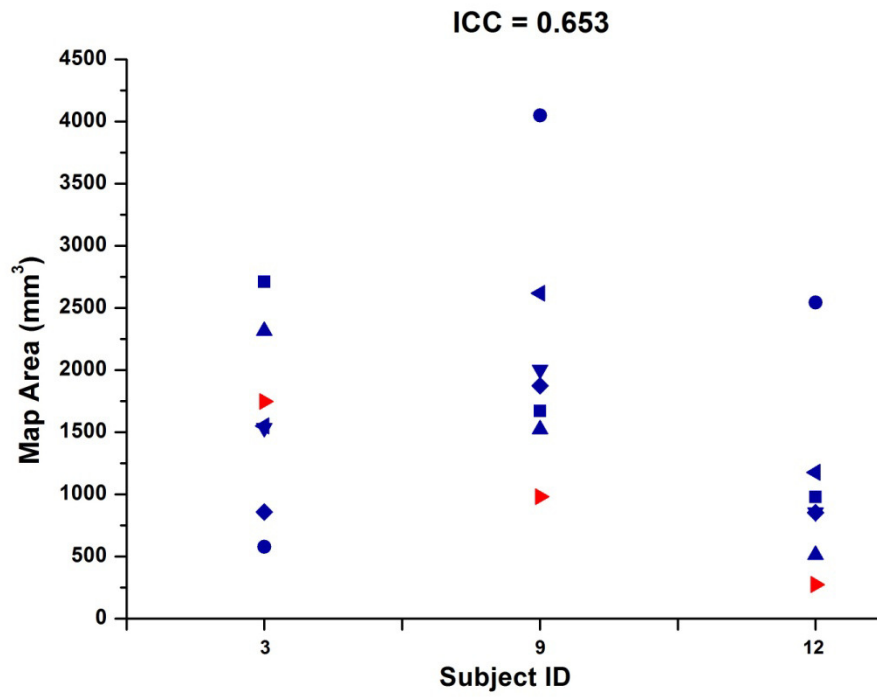

c)

d)

e)

f)

Supplementary figure 2: Motor map group data with mean MEP amplitude in the right hemisphere for the same six subjects examined in the left hemisphere. Color bar indicates mean MEP amplitude in μV throughout the experimental sessions.
