

TG/HDL-C	Sensitivity	Specificity
1.0	89%	33%
1.5	77%	62%
2.0	69%	77%
2.5	57%	86%
3.0	46%	92%

Supplementary Fig. 1. Receiver-operating characteristic curve of TG/HDL-C ratio to predict insulin resistance estimated by estimated insulin sensitivity index in women with polycystic ovary syndrome. AUC, area under the receiver-operating characteristic curve; CI, confidence interval; TG, triglycerides; HDL-C, high-density lipoprotein cholesterol.
