

TG/HDL-C	Sensitivity	Specificity
1.0	90%	31%
1.5	72%	52%
2.0	64%	72%
2.5	53%	77%
3.0	43%	85%

**Supplementary Fig. 2.** Receiver-operating characteristic curve of TG/HDL-C ratio to predict impaired glucose tolerance/impaired fasting glucose/diabetes mellitus in women with polycystic ovary syndrome. AUC, area under the receiver-operating characteristic curve; CI, confidence interval; TG, triglycerides; HDL-C, high-density lipoprotein cholesterol.
