

TG/HDL-C	Sensitivity	Specificity
1.0	90%	31%
1.5	70%	50%
2.0	60%	72%
2.5	50%	77%
3.0	40%	85%

Supplementary Fig. 3. Receiver-operating characteristic curve of TG/HDL-C ratio to predict impaired glucose tolerance/diabetes mellitus in women with polycystic ovary syndrome with a normal fasting glucose level. AUC, area under the receiver-operating characteristic curve; CI, confidence interval; TG, triglycerides; HDL-C, high-density lipoprotein cholesterol.
