

Supplementary information, Figure S3 Structural superimposition of cytoplasmic domains between C1 (gray) and C4 (violet).

(A-D) Comparison of the Central domain (**A**), Helical domain (**B**), Handle domain (**C**) and NTD (**D**) between the C1 and C4 structures using two different strategies. *Left* in each panel: Structural superimposition relative to the tetrameric channel domain. *Right* in each panel: Domain-wise comparison.
