## SUPPORTING INFORMATION

Additional Supporting Information may be found in the online version of this article:

**Figure S1.** Representative micrographs of testicular sections from rats pre-treated with EDS (A), and pre-treated with EDS and then treated with HN for 12 h (B). Absence of Leydig cells induced by EDS treatment (A, red arrow) were not rescued by HN (B, red arrows). HN treatment decreased EDS-induced germ cell apoptosis (B, black arrows) as compared with EDS treatment alone (A, black arrows). Scale bar = 100 micrometer.
