

Table S2: Adherence parameters in different medication groups

Medication groups	PDC (mean±SD)	MPR (median (IQR))	Non persistence (%)
<i>Beta-blocker use</i>	86±15	98 (86-107)	18
<i>Alpha-blocker use</i>	87±14	98 (88-107)	14
<i>Calcium channel blocker use</i>	88±14	99 (90-108)	15
<i>Loop diuretic use</i>	84±17	98 (82-110)	21
<i>Thiazide diuretic use</i>	82±21	96 (75-106)	23
<i>ACEI/ARB use</i>	88±15	101 (90-112)	15
<i>Direct Vasodilator use</i>	83±17	97 (80-110)	20
<i>Aspirin use</i>	86±16	95 (80-105)	25
<i>Statin use</i>	87±15	97 (86-104)	18

Abbreviations: ACEI/ARB: Angiotensin Converting Enzyme Inhibitors/Angiotensin Receptor

Blockers; IQR: Interquartile Range; MPR: medication possession ratio; SD: Standard Deviation;

PDC: Proportion of Days Covered;

Data are presented as mean (SD), median (IQR) and n (%) as appropriate.
