**Odds ratios and relative ranks from fixed- and random-effects network meta-analyses across all isoniazid resistance profiles- one arm of Girling *et al.* 1991 recoded to regimen RIF ED<3 D=6m**

Sensitivity analysis regrouping one treatment arm of Girling *et al.* 1991 [1] from regimen RIF ED $\geq$ 3 Pr6 D=6m to RIF ED<3 D=6m to reflect uncertainty during categorisation. Crl- credible interval, OR- odds ratio

Sensitivity analysis regrouping one treatment arm of Girling *et al.* 1991 [1] from regimen RIF ED $\geq$ 3 Pr6 D=6m to RIF ED<3 Pr6 D=6m (and thereby losing the study from the network, due to both treatment arms being grouped the same) to reflect uncertainty during categorisation.
