

Figure S6. *grxs17* and *elo3-6* mutants show similar molecular defects. qPCR validation of gene expression in *grxs17-1* and *grxs17-2*. The expression ratio relative to that in wild-type Col-0 seedlings is plotted (set at 1). Bars represent means \pm SE of n=3 (*, P<0.05; **, P<0.01; ***, P<0.001, Student's t-test).
