

Supplemental Figure S6. Plasmodesmal localization of SP-mCitrine fused to GPI signal of Arabidopsis COBRA protein (At5g60920) (mCit-GPI^{COBRA}), and SP-GFP fused to GPI signal of BG_pap (GFP-GPI^{BG}) in transient expression in *N. benthamiana*. **A-A''**, Co-localization of mCit-GPI^{COBRA} with MP-RFP at Pd. **B-B''**, Co-localization of GFP-GPI^{BG} with MP-RFP at Pd. Diagrams of the native proteins and FP fusions are shown above. Bars = 5 μm.
