# Graphlet Based Metrics for the Comparison of Gene Regulatory Networks:
Fig S1: Topological comparison of two small networks

Alberto J.M. Martin, Calixto Dominguez, Sebastián Contreras-Riquelme, David S. Holmes and Tomas Perez-Acle

Node	# Graphlet	RGD
A	4	0.835
B	5	0.868
C	3	0.89
D	4	1
E	2	0.835

Example on how REC and RGD are used to compare two simple networks. A) shows the two small networks that are been compared; B) identification of each graphlet in each network; C) calculation of REC for each graphlet; D) computation of how RGD for node B. Black edges denote true interactions, and red-dashed edges depict false ones.
