

Title: Characterisation of *AGER* in the airways and periphery

Supplementary File

S3 Table. Linear regression analysis of serum sRAGE level and lung function measures FEV₁, FVC and FEV₁/FVC. Serum sRAGE levels was not associated with FEV₁, FVC or FEV₁/FVC when subjects were stratified by genotype. F = statistical significance of the regression equation as a whole.

Samples	Lung function measure	F	P value
All (n = 102)	FEV ₁	0.869	0.354
	FVC	0.379	0.504
	FEV ₁ /FVC	0.515	0.475
C:C genotype	FEV ₁	0.493	0.486
	FVC	1.195	0.280
	FEV ₁ /FVC	0.385	0.535
C:T genotype	FEV ₁	0.063	0.804
	FVC	0.001	0.982
	FEV ₁ /FVC	0.002	0.968
