

SUPPLEMENTARY DATA

Supplementary Figure 1. Cumulative incidence of progression to macroalbuminuria in participants with normoalbuminuria (upper panel) and microalbuminuria (lower panel) at baseline by treatment group. Dashed line = placebo, solid line = losartan. Log-rank tests for the macroalbuminuria outcome yielded $P=0.33$ in the normoalbuminuria group and $P=0.17$ in the microalbuminuria group.
