

Figure S3: Age at tumour diagnosis for HPV positive, HPV16 single infected and HPV16 A1-3 invasive squamous cell carcinomas stratified by anatomical location: Boxplots represent the median, the 25% and 75% quantiles. Median and range (1.5 x Inter-quantile) are represented in brackets below the boxplots. Number of samples are represented in brackets below the anatomical location. HPV16 positive samples include all the types detectable through SPF10-LIPA25 protocol (version 1; Laboratory Biomedical Products, Rijswijk, Netherlands)
