

Intestine-specific homeobox (ISX) upregulates E2F1 expression and related oncogenic activities in HCC

SUPPLEMENTARY FIGURE

Supplementary Figure S1: Relative expression levels of proteins in cells induced by forced expression vectors ISX and/or E2F1 and knockdown vectors ISX and/or E2F1. A. Relative expression levels of protein in SK-Hep1 cells were calculated from the intensities of the respective bands shown in Figure 3D. B. Relative expression levels of protein in SK-Hep1 and PLC5 cells were calculated from the intensities of the respective bands shown in Figure 3E. C. Relative expression levels of protein in SK-Hep1 and Huh 7 cells were calculated from the intensities of respective bands shown in Figure 3F. All results are shown as means \pm S.D. ($N = 3$), a, $p < 0.001$.
