

This is a survey on attitudes toward political issues and groups of people. This same survey is being conducted in several countries around the world.

We do not collect any names in this survey, and no one will know that you answered the questions in the way that you answered them. Please be as honest as possible when answering the questions. If you feel uncomfortable answering a question, please simply skip that question.

First, we would like to ask you about your opinions on several issues that people often hear about in the news. Please circle "yes" or "no" for each question:

We would like to get your feelings towards some different groups in society, using something called a *feeling thermometer*. Ratings between 50 degrees and 100 degrees mean that you feel *warm and favorable* toward that group. Ratings between 0 degrees and 50 degrees mean that you *don't feel favorable* toward that group and *don't care much for the group*. You would rate a group at 50 if you didn't feel particularly warm or cold towards that group – you feel neutral.

For each group, please place a *check mark* or a *line* in box that contains the *temperature* that best represents **your feeling** toward each group of people below. So, how do **you** feel about each group?
