

S1 Fig. T cell specific deletion of MyD88 in $MyD88^{fl/fl} \times LCK^{cre}$ mice. Splenocytes from $MyD88^{fl/fl} \times LCK^{cre}$ (red line), $MyD88^{fl/fl} \times LCK^{wt}$ (blue line) or $MyD88KO$ (gray solid histogram) were stained for surface markers and intracellularly stained for MyD88. MyD88 expression on T cells or B cells is shown.
