

Supplementary Figure 1: NF- κ B inhibition decreases *in vitro* migration and invasion: Triptolide decreases (a) KPC cellular migration as determined by ECIS; (b) KPC Boyden chamber invasion; and (c) MIA PaCa-2 and S2-013 Boyden chamber invasion. Each bar is representative of three or more independent experiments; error bars are represented in SEM; and the asterisk (*) indicates a p value < 0.05.
