

Technetium-99m-labeled rituximab for use as a specific tracer of sentinel lymph node biopsy: a translational research study

SUPPLEMENTARY FIGURES

Supplementary Figure S1: A–C. Dynamic sentinel lymphoscintigraphy at 1, 4, and 24 h after intradermal injection of ^{99m}Tc -IgG antibody in the rear pad of bal/c mice (Arrow: sentinel lymph node).

Supplementary Figure S2: Dynamic sentinel lymphoscintigraphy after intradermal injection of ^{99m}Tc -labeled dextran A. and ^{99m}Tc -labeled sulfur colloid B. in bal/c mice. A chain of lymph nodes were visualized 30 min after injecting the radiotracer in the rear pad of bal/c mice. (Arrow: sentinel lymph node).
