

Additional file 6

Time course of lipid production of *Leucosporidium creatinivorum* DBVPG 4794 (grown at 20°C), *Naganishia adeliensis* DBVPG 5195 and *Solicoccozyma terricola* DBVPG 5870 (both at 25°C).

Y_L = Total lipid yield; DW = cell dry weight; Y_L/DW = total intracellular lipids on cell biomass; Y_L/Glu = lipid coefficient.
