

Supplemental Table S1. *Analysis of Arabidopsis stress literature based on PubMed search terms*

PubMed search terms: Arabidopsis + stress ^a + B vitamins or hormones below			
B Vitamin	Hits	Hormone	Hits
Thiamin	7	Auxin	457
Folate	5	Gibberellin	143
Pyridoxine	18	Cytokinin	148
Nicotinate	3	Absciscic acid	1704
Biotin	0 ^b	Ethylene	568
Pantothenate	2	Jasmonate	586
Riboflavin	4	Salicylic acid	561
		Nitric oxide	169
		Brassinosteroid	78
Total	39	Total	4414

^aHits from the search term 'stress' encompass diverse abiotic stress studies and include only a small minority (<5%) of studies that involve only biotic stresses.

^bCurated to remove cases in which biotin was used solely as a reagent.
