**Supplementary Figure 5 Distribution of migration steps of juxtaglomerular neurons**

Supplementary Figure 5 Distribution of migration steps of juxtaglomerular neurons.
(A) Normalized histogram of all migration steps measured within the GL (n=771 steps, 187 cells).
(B) Cumulative histogram of the data shown in **(A)**. Dotted lines help to read out the peak value in **(A)** and the value of 90th percentile in **(B)**.
