

# MUC1-C induces DNA methyltransferase 1 and represses tumor suppressor genes in acute myeloid leukemia

## Supplemental Material

### A. MOLM-14

### B. MOLM-14

**Supplemental Fig. S1. Silencing MUC1-C derepresses PTEN and BRCA1 expression in MOLM-14 cells.** (A and B) The indicated MOLM-14 cells were analyzed for PTEN (A) and BRCA1 (B) mRNA levels by qRT-PCR (left). The results are expressed as a relative mRNA levels (mean $\pm$ SD of three determinations) as compared to that obtained with CshRNA cells (assigned a value of 1). Lysates from MOLM-14/CshRNA and MOLM-14/MUC1shRNA cells were immunoblotted for indicated antibodies (right).
